## INTRODUCTION

The present report is one of a series presenting the findings of the 1971 Census with respect to the family.

Tables 29 to 33 show families by age and sex of head, while Tables 34 to 37 show families by marital status and sex of head. Detailed cross-classifications relating these characteristics to family size, composition, type, etc. appear in Report II (2-6), Catalogue No. 93-718.

The areas for which these figures are shown are as follows:

- (i) Canada and provinces, urban, rural non-farm and rural farm (Tables 29, 34); Table 29 includes urban size groups;
- (ii) census divisions (Table 30);
- (iii) incorporated cities, towns and other municipal subdivisions of 10,000 population and over (Tables 31, 35);
- (iv) census metropolitan areas (Tables 32, 36); and
- (v) census agglomerations of 25,000 population and over (Tables 33, 37).

Comparative figures from the 1961 Census are shown for families by age of head in Table 28.

All figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Additional details on the random rounding technique may be obtained by writing to the Census User Inquiry Service, Statistics Canada, Ottawa K1A 0T7.

Ce bulletin fait partie d'une série qui présente les résultats du recensement de 1971 relativement aux familles.

Les tableaux 29 à 33 donnent des données sur les familles selon l'âge et le sexe du chef, tandis que les tableaux 34 à 37 donnent des données sur les familles selon l'état matrimonial et le sexe du chef. Des classements détaillés de ces caractéristiques sur la taille de la famille, la composition, le genre, etc. sont donnés au volume II (2-6), n° 93-718 au catalogue.

Les chiffres sont publiés pour les secteurs suivants:

- i) Canada et provinces, régions urbaines et régions rurales non agricoles et rurales agricoles (tableaux 29, 34); le tableau 29 comprend les régions urbaines par groupe de taille;
- ii) divisions de recensement (tableau 30);
- iii) cités et villes constitués et autres subdivisions municipales de 10,000 habitants et plus (tableaux 31, 35);
- iv) régions métropolitaines de recensement (tableaux 32, 36); et
- v) agglomérations de recensement de 25,000 habitants et plus (tableaux 33, 37).

Le tableau 28 donne les chiffres comparables de 1961 sur les familles selon l'âge du chef.

Par souci de confidentialité, tous les chiffres publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. On peut obtenir d'autres détails sur la technique d'arrondissement aléatoire en s'adressant au Service-utilisateurs, Direction du recensement, Statistique Canada, Ottawa K1A 0T7.

#### DEFINITIONS

**Family:** A census family consists of a husband and wife (with or without children who have never been married, regardless of age) or a parent with one or more children never married, living in the same dwelling. A family may consist, also, of a man or woman living with a guardianship child or ward under 21 years for whom no pay was received.

**Family head:** Refers to the husband in a husband-wife family or the parent in a one-parent family.

**Age:** Age classifications in the census are based on the number of completed years of age at last birthday prior to June 1, 1971.

**Marital status of family head:** Refers to the conjugal status of the family head such as single, married, widowed or divorced. Unless otherwise specified, data for "separated" are included with married.

Definitions of these and other terms, including geographic terms used technically in this report are discussed in the Introductory Report Volume II (2-1).

#### DÉFINITIONS

**Famille:** Une famille de recensement se compose de l'époux et de l'épouse avec ou sans enfants célibataires (peu importe leur âge) ou l'un ou l'autre des parents avec un ou plusieurs enfants célibataires vivant dans le même logement. Une famille peut être formée également d'un homme et d'une femme vivant avec un enfant en tutelle ou un pupille de moins de 21 ans pour lequel ils ne reçoivent pas de rétribution.

**Chef de famille:** Le chef de famille est l'époux dans une famille époux-épouse ou le père ou la mère dans une famille monoparentale.

**Âge:** Âge, en années révolues, au dernier anniversaire avant le jour du recensement.

**État matrimonial du chef de famille:** État conjugal: célibataire, marié, veuf ou divorcé. Sauf indication contraire, les personnes "séparées" sont comptées avec les personnes "mariées".

Les définitions de ces termes et d'autres termes techniques employés dans ce bulletin sont données dans l'Introduction au volume II (2-1).

Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

### Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

### How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. ### Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Division, Statistics Canada, Ottawa K1A 0T7.

### Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. A standard User's Request Form on which to outline precise tabulation requirements and to request time and cost estimates may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

### Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.
